

## PROFILE

A hardworking and reliable front-end engineer with 8 years experience. I specialise in front end JavaScript and bespoke website builds. My knowledge in web development has evolved from my passion of problem solving and getting results. I am self motivated, disciplined and have a keen eye for detail. I have experience in full stack JavaScript development and can work independently or alongside a high level development team. For more information about my work please see my personal website, [tomhoadley.co.uk](http://tomhoadley.co.uk), which includes case studies and articles on JavaScript and software engineering.

## SKILLS

- |                               |                           |                           |
|-------------------------------|---------------------------|---------------------------|
| ✓ HTML 5, CSS3 / Sass         | ✓ Typescript              | ✓ Test Driven Development |
| ✓ Responsive Websites         | ✓ Node.js, Express, Mongo | ✓ CI / CD                 |
| ✓ Animated, Interactive Sites | ✓ PHP, Object Oriented    | ✓ Git Version Control     |
| ✓ Javascript (ES6)            | ✓ SQL and Data Migration  | ✓ User Interface Design   |
| ✓ React, Redux                | ✓ Functional Programming  | ✓ Docker                  |

## WORK EXPERIENCE

### Senior Web Developer, The PHA Group – 2016 Sept – 2020 Jan

- Wrote complex JavaScript for an array of functionality including custom calendars, shopping carts, shortlist builders, donation systems, API integrations, user interface animations, mortgage calculators and more.
- Worked with React to build a shopping cart and a headless CMS.
- Sole developer of numerous, complex, bespoke, responsive websites with a focus on high end finishes, animations and interactivity.
- Wrote PHP and SQL for transforming and migrating extensive amounts of data, curl requests, shipping calculators and utilised composer for PHP package management.
- Worked alongside a designer to advise on how functionality could inform design for the best results.

### Front end Web Developer, Monochrome Ltd. – 2014 June – 2015 October

- Worked alongside a senior developer on full stack JavaScript web apps where I gained knowledge of CI / CD, TDD and the importance of clean code through a rigorous peer review system.
- I learnt the importance of version control and gained a good basis of general software engineering concepts such as MVC, Restful API's, and the concept of SOLID in software development.
- Built bespoke websites in a high paced environment.

### Front end Web Developer, 20two Creative – 2014 March – 2014 July

- Built a number of websites while contracting for this small Leatherhead based web agency.
- Worked along side a designer to build websites and learnt the importance of completing a high quality website within deadline and budget.

## Freelance Web Developer, [tomhoadley.co.uk](https://tomhoadley.co.uk) — 2020 January - present

- At various stages in my career and whilst looking for the right opportunity, I have been working as a freelancer. Recently I have been freelancing via a network of contacts including agencies, previous employers, colleagues, friends and family.
- Had to be self motivated, disciplined and autonomous to ensure I worked to a high standard and my clients were always happy.
- I am selective in the work I take on which gives me flexibility and reassures clients they will only ever get my best. This is reflected in the testimonials you can find on my personal portfolio.

## PORTFOLIO

A select list of bespoke built websites and applications that I was the sole developer on. For more, please visit <https://tomhoadley.co.uk>.

- **Frontend Shopping Cart** - React — <https://tomhoadley.co.uk/work/react-shopping-cart>
- **Expense Tracker** - React with hooks and context API - <https://github.com/ThomasHoadley/react-context-api-with-hooks>
- **React, Redux Headless CMS Template** - React, Redux - <https://github.com/ThomasHoadley/react-redux-headless-cms>
- **Journal app** - Node, Express, Mongo app - <https://tomhoadley.co.uk/work/journalled-beta>
- **Personal Organiser** - Vanilla JavaScript app - <https://tomhoadley.co.uk/work/personal-organiser>
- **Wizzo & Co** - <https://wizzoandco.co.uk>
- **Patientory** - <https://patientory.com>
- **Morgans Dairy** - <https://morgansdairy.co.uk>
- **Nomo Chocolate** - <https://nomochoc.com>
- **Emirates Sports Medicine** - <https://www.emiratessportsmed.com>

## EDUCATION

University of Leeds  
2.1 BA Environmental Sustainability  
September 2010 – June 2013

Glyn Technology School  
6th Form | English Literature (A), Information Technology (A), Geography (B).  
GCSE's | 11 A – B grades. Maths, English (A)

## INTERESTS

Other than avidly pursuing my passion in web development and the latest digital technologies, I enjoy keeping fit and playing sport, including - running, football, cycling and yoga. I also enjoy reading and of course spending time with friends and family!
